Hyderabad, India • +91 9100447112 • pk591947@gmail.com • linkedin.com/in/pavan-kalyan-budamacharla • github.com/KA-L-YAN • pavan-here.netlify.app

## DATA ENGINEER | DATA INTEGRATION | AWS

Data-focused software engineer with production experience working on distributed data-integration workflows, batch processing, database/file transfers, AWS services, and production troubleshooting. Experienced with source-to-target data movement across databases, SFTP and object storage, including work around AWS Glue ETL, S3, SQS, CloudWatch, DynamoDB and EC2. Strong hands-on exposure to debugging pipeline failures, tracing data through multi-stage integration flows, and improving long-running processing jobs. Background in Python, SQL, JVM-based systems and data science.

## CORE SKILLS

|                  |                                                                                                                       |
|------------------|-----------------------------------------------------------------------------------------------------------------------|
| Data Engineering | ETL/ELT concepts, batch processing, data integration, source-to-target pipelines, file/API ingestion, troubleshooting |
| AWS              | S3, Glue, SQS, CloudWatch, DynamoDB, EC2                                                                              |
| Data & Databases | SQL, Oracle, MySQL, PostgreSQL, database-to-database transfers, SFTP                                                  |
| Programming      | Python, Scala, Java (familiarity), C                                                                                  |
| Engineering      | Git, Linux/Bash, Docker, production support, logging, debugging, performance optimization                             |

## PROFESSIONAL EXPERIENCE

### Tech Mahindra — Associate Software Engineer, Backend & Data Integration | Hyderabad, India | Sep 2024 - Present

- Work on production data-integration workflows that move data between enterprise systems through database, API, SFTP and cloud-storage based paths.
- Worked across source-to-target patterns including database-to-database, SFTP-to-S3, Oracle DB-to-S3 and S3-to-SFTP, with responsibility spanning implementation, debugging and operational support.
- Developed and supported ETL workloads in AWS Glue and worked with the surrounding AWS flow, including S3 for file/object handling, SQS queues and dead-letter queues, CloudWatch logs, DynamoDB scheduling/state checks and EC2 operations.
- Troubleshoot integration failures by tracing data and execution state across multiple stages, inspecting logs and queues, validating schedules and source/target behavior, and identifying the failing component rather than treating the pipeline as a single black box.
- Optimized two critical data-processing jobs that previously ran for more than 175 minutes, bringing execution time to under 15 minutes through bottleneck analysis and pipeline-logic improvements — roughly a 90% reduction in runtime.
- Supported migration/evolution of existing integration workloads toward AWS Glue and investigated issues arising during execution and deployment, building practical understanding of cloud-based ETL operations.

### Blackbuck Engineers Pvt. Ltd. — Project Intern, Machine Learning | Remote | Jun 2023 - Sep 2023

- Built Python preprocessing scripts for large datasets used in supervised and unsupervised learning workflows.
- Analyzed model-performance metrics and translated technical results toward stated business requirements.

## EDUCATION

NRI Institute of Technology — B.Tech, Computer Science & Engineering (Data Science), CGPA 8.85 | 2021-2024

Indian Institute of Technology, Kanpur — Non-Degree Students Programme, Large Data Analysis & ML | 2023

## SELECTED PROJECTS

Deep Learning Bird Identification — Python, CNN, Keras | Trained a CNN-based wildlife-identification model to 94% accuracy; research article published in IJRAR.

Vehicle Service Management System — Java, Spring Boot, MySQL | Built a role-based backend with JWT/Spring Security, REST APIs, normalized relational schema, validation and layered architecture.

## CERTIFICATIONS

AWS Certified Machine Learning – Associate (2025) • Microsoft Certified: Azure AI Engineer Associate (AI-102) (2025) • Microsoft Certified: Azure Fundamentals (AZ-900) (2025) • IBM Python for Data Science (2025) • GitHub Copilot Certification (2025)
